

Clinic RAMQ configuration form

Here are the information needed to set up a FMG clinic in the Omnimed EMR. **This information must be obtained from the RAMQ.** This interface will allow the client to receive a daily list of patients who are registered with the RAMQ and to consult the FMG or off FMG registration of a patient in the EMR as well as his vulnerability codes up to a maximum of three codes per patient.

Full name of the site (FMG and off FMG)		FMG reference number (1XXX)	
lame of your FMG site or off	FMG and the access	code AIP (ID MACI	HINE) of your site (AIPXXXXXX) a

The identified CE code must have access and permissions for the entire group of physicians. If the CE code doesn't have access to certain physicians, the synchronisation won't be authorized and won't work for the unauthorized physicians. Only one CE code is used for this synchronization step.
